3. Analysis Session
4. Conclusion & Application Session

in counseling room

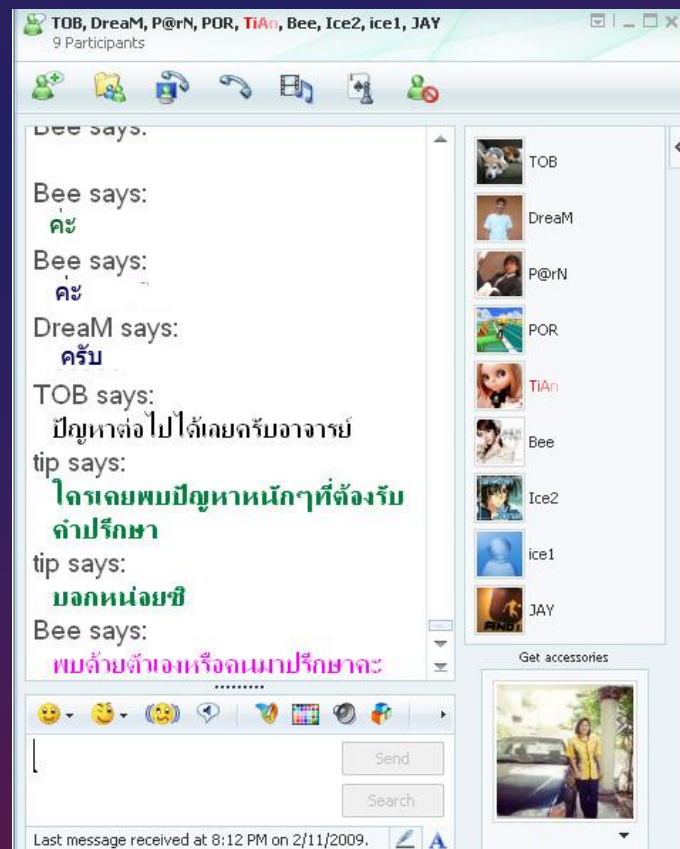

Concept / Theories (5)

3. Online Group Work Activities

Online Group Work Activities

The procedures of Online Group Work Activities are as following.

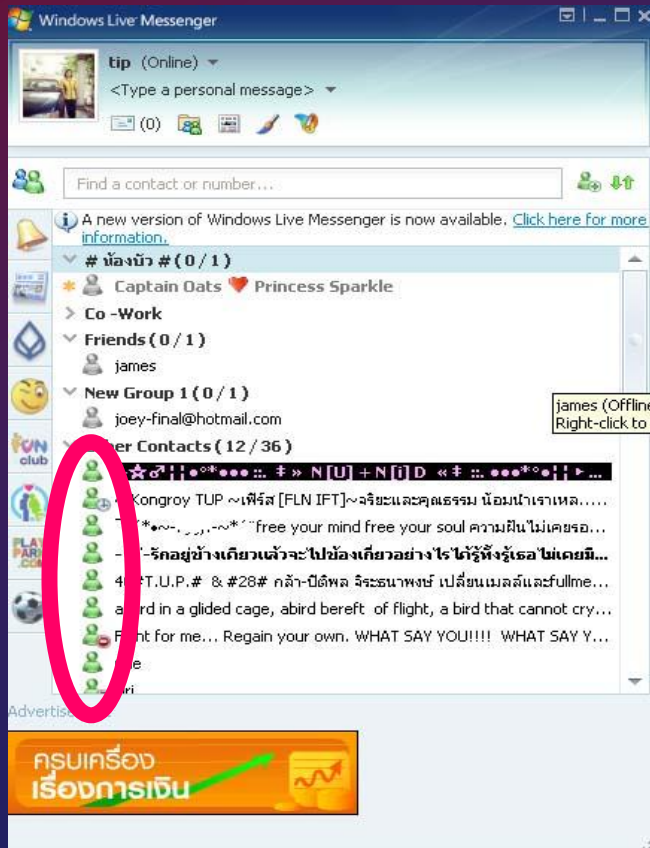

1. Introduction Session
2. Practice Session
3. Analysis Session
4. Conclusion & Application Session

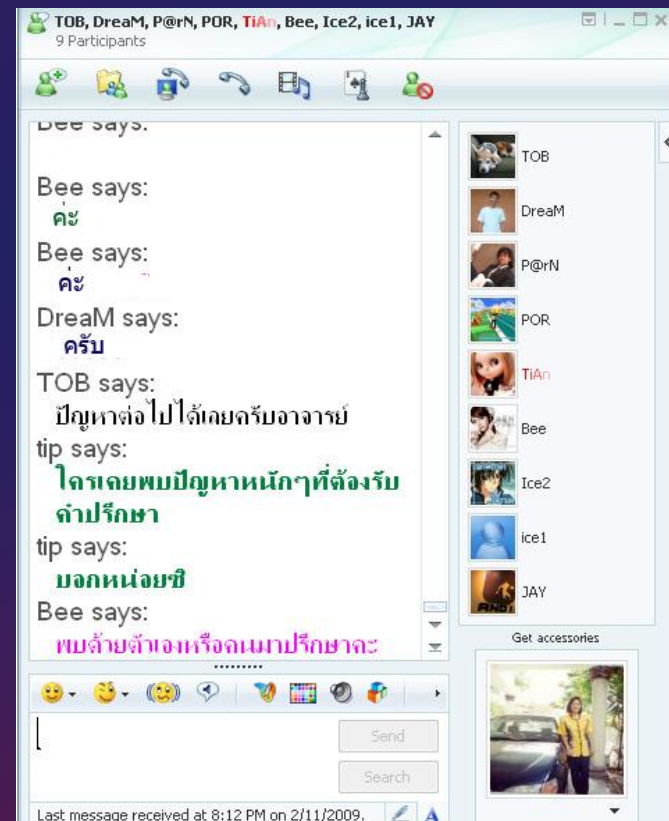

with Chat Program MSN Messenger

Concept / Theories (6)

Open Program Chat MSN (Step1-2)

Step1 Open Program Chat MSN , Green friend is online but Black friend is offline

Step2 Double click Green friend or click invite others for talking to your group friends.

Concept / Theories (7)

Process of Group Work Activities and Online Group Work Activities were as following

1.To develop the desirable Characteristics on Youth Counselor, counsel and suggest solutions for severe problems.

2.To utilized the necessary techniques for counseling, deny techniques, solving problem procedure.

3.To learned about personalities , ethics on Youth Counselor.

Research's Objectives (1)

1.To compare the desirable Characteristics of Youth Counselors ,before and after attended Group Work Activities.

before

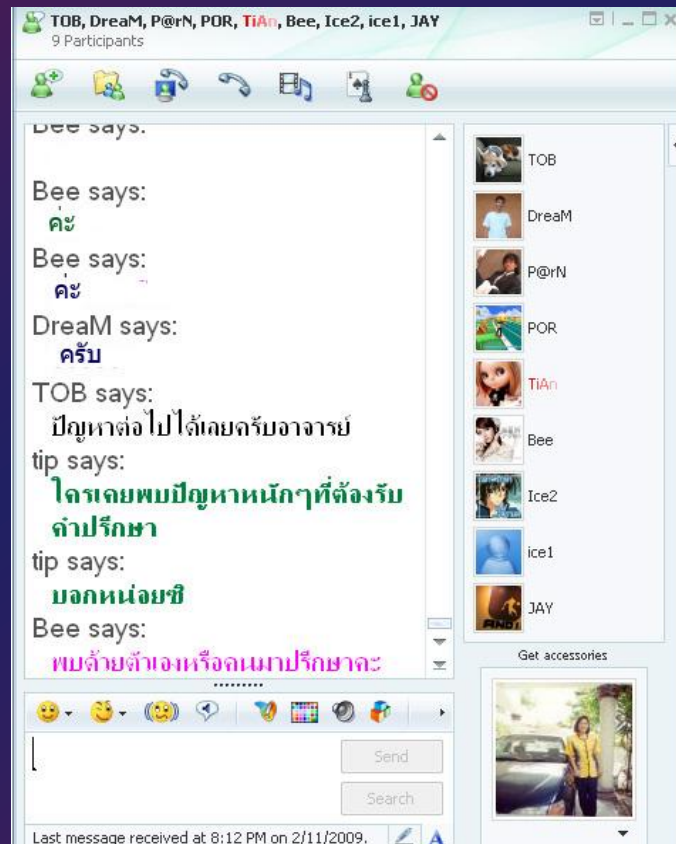

after

Research's Objectives (2)

2. To compare the desirable Characteristics on Youth Counselors before and after attending Online Group Work Activities.

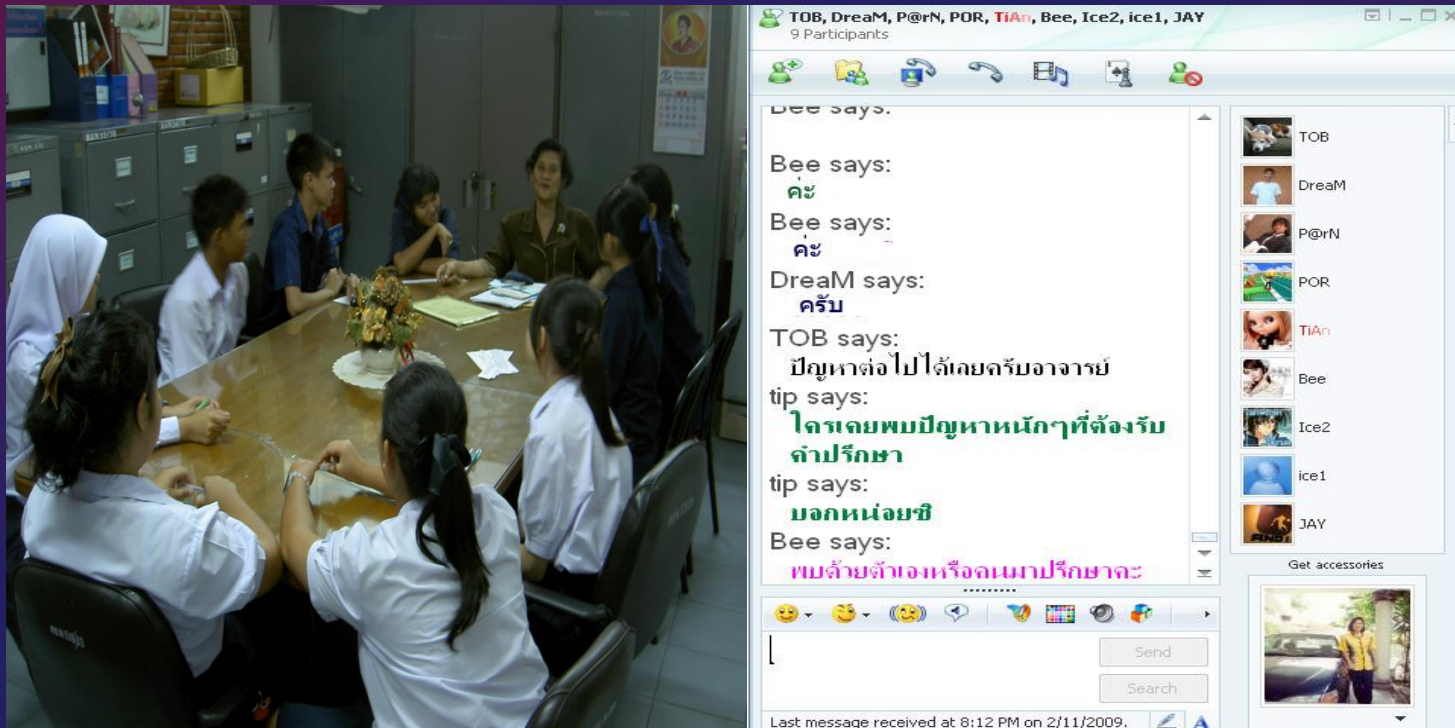

before

after

Research's Objectives (3)

3. To compare the desirable Characteristics of Youth Counselors for both after ending of experiment and the end of following up period which is 1 month after attended Group Work Activities and Online Group Work Activities.

after

1 month after

Research's Objectives (4)

4. To ensure the Youth Counselors, who attended Group Work Activities and Online Group Work Activities, are able to help their friends by counseling.

Research Hypothesis (1)

1. The Youth Counselors has the better desirable Characteristics for Youth Counselor after attending Group Work Activities.

before

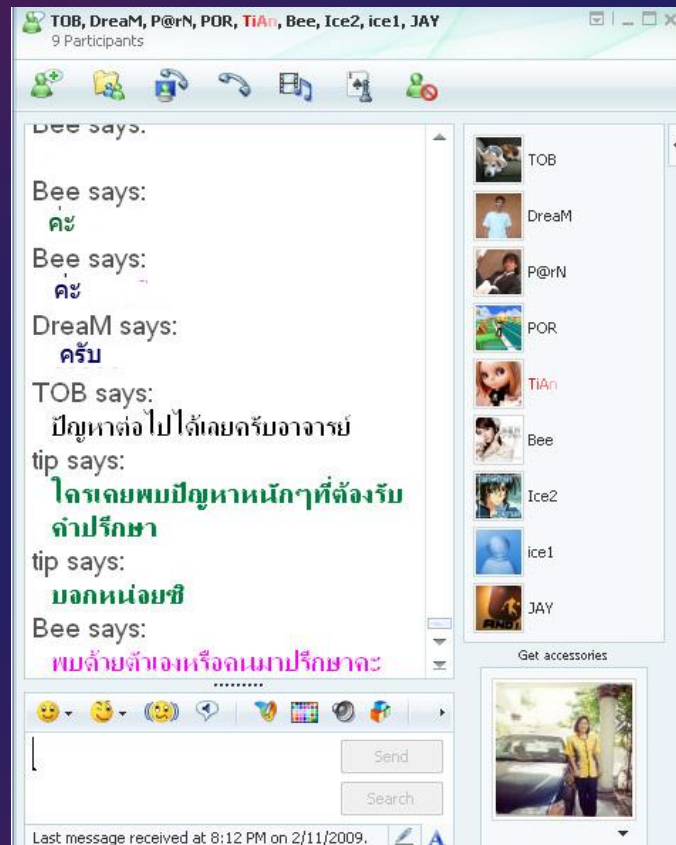

after

Research Hypothesis (2)

2. The Youth Counselor has the better desirable Characteristics for Youth Counselors after attending Online Group Work Activities.

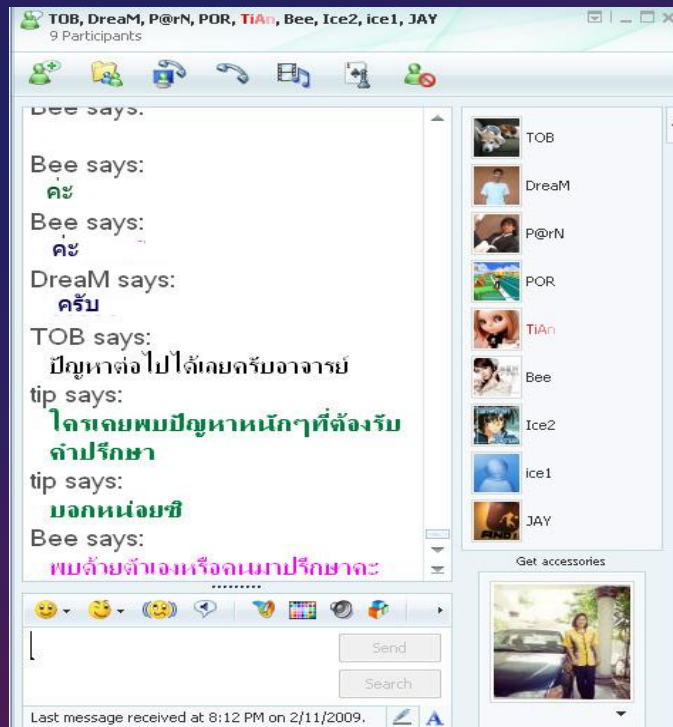

before

after

Research Hypothesis (3)

3. At the end of following up period which was 1 month after ending the experiment, there has been an increase in levels on desirable characteristics on Youth Counselors attending Group Work Activities and Online Group Work Activities..

after

1 month
after

Population

The Youth Counselors all each classes 2 students each class. of Triamudom Suksa Pattanakarn School in 2008, There are 108 Youth Counselors in total.

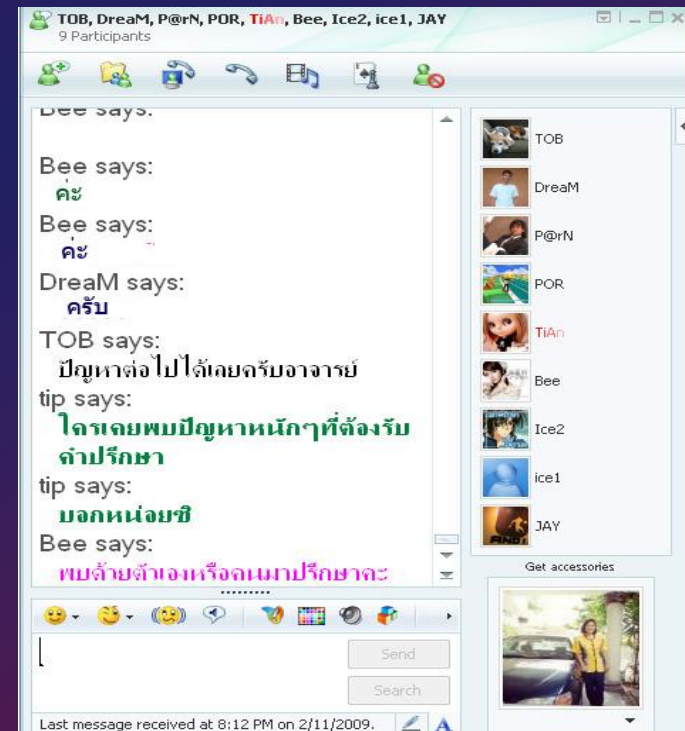

all each classes 2 students each class.

Sample

The Sample of Youth Counselors is studying in high school classes using simple random sampling, allocated into 2 experiment groups ,Each group were 9 Youth Counselors

9 Youth Counselors

9 Youth Counselors

Conceptual Framework

**Attended by the Group
Work Activities**

**Attended by the Online
Group Work Activities**

**Diserable Characteristics
for Youth Counselors are**

- 1. personalities**
- 2. Interests**

Variables

Independent Variables were 2 following methods.

1. Group Work Activities
2. Online Group Work Activities

Dependent Variables were the desirable Characteristics for Youth Counselor

Tools for Measurements or Evaluations (1)

- 1. Examination form for Desirable Characteristics for Youth Counselors**
 - 2. Observation Evaluation**
 - 3. Individual Opinion Evaluation**
 - 4. Counseling Records**
- 

Tools for Measurements or Evaluations(2)

1. Examination form for Desirable Characteristics for Youth Counselor (**personalities and interesting**)

Example

Examination form for **personalities**

1. I am able to keep secret.
 2. I am prudent.

- 

Data collection (1)

1. Preparation for Experiment Phase, provided by the following:

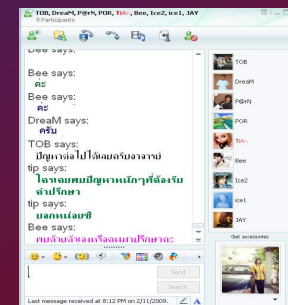

- present Project to the management

- Prepare sample group.

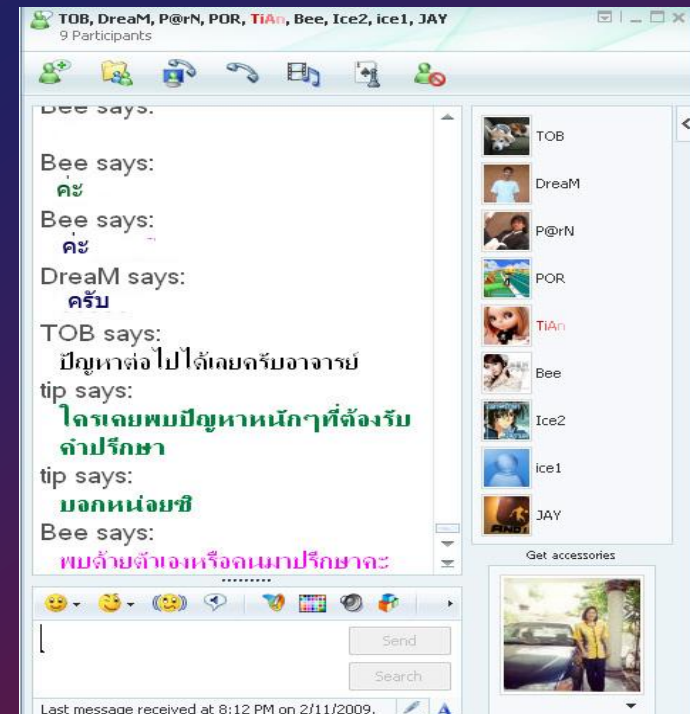

- Prepare 2 group activities, appointments

Data collection (2)

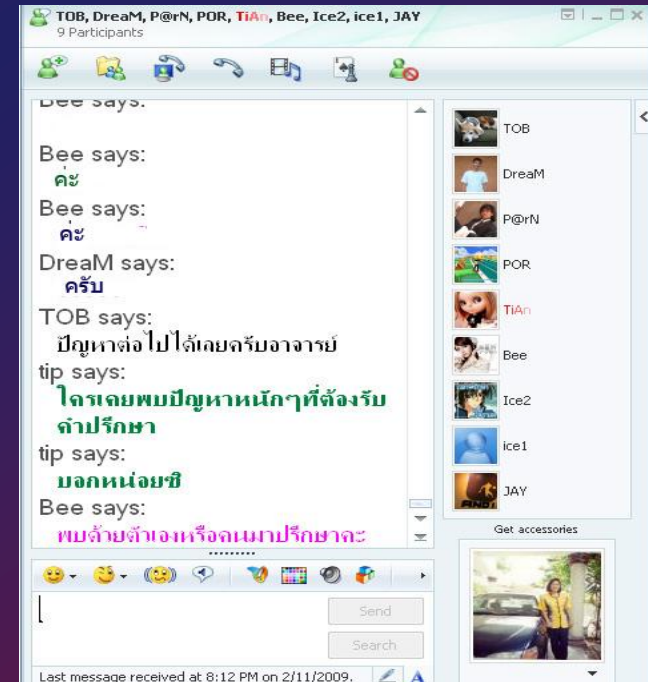

2. Experiment Phase. The procedures were. Introduction Session, Practice Session, Analysis Session. and Conclusion & Application Session

Data collection (3)

3. Post-Experiment Phase.

Bring the results of both before and after experiment to analyze statistic tools.

At .01 statistical significant level
At .05 statistical significant level

The study results were as following (1)

1. Youth Counselor attended Group Work Activities has the desirable Characteristics for Youth Counselor better than before attending Group Work Activities at .01 statistically significant level .

before

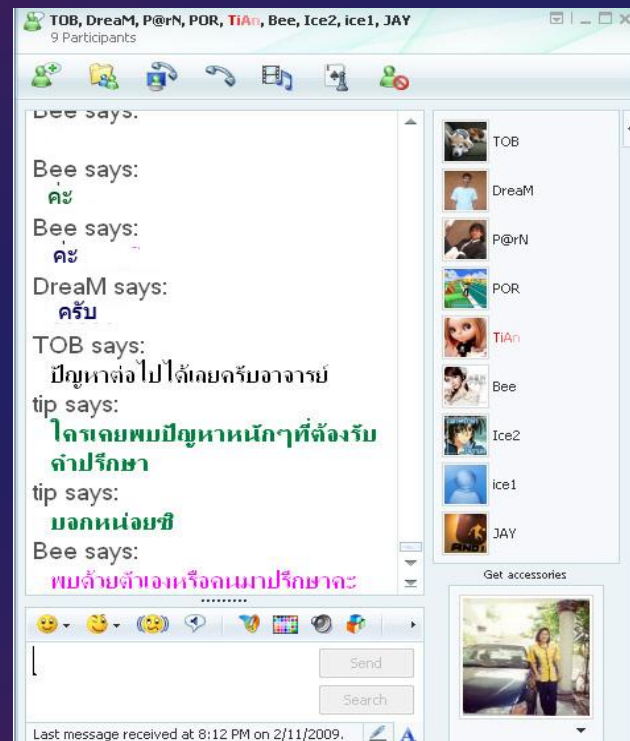

after

At .01 statistically significant level

The study results are as following (2)

2. Youth Counselor attended Online Group Work Activities has the desirable Characteristics for Youth Counselor better than before attending the Online Group Work Activities at .01 statistical significant level

before

after

At .01 statistical significant level

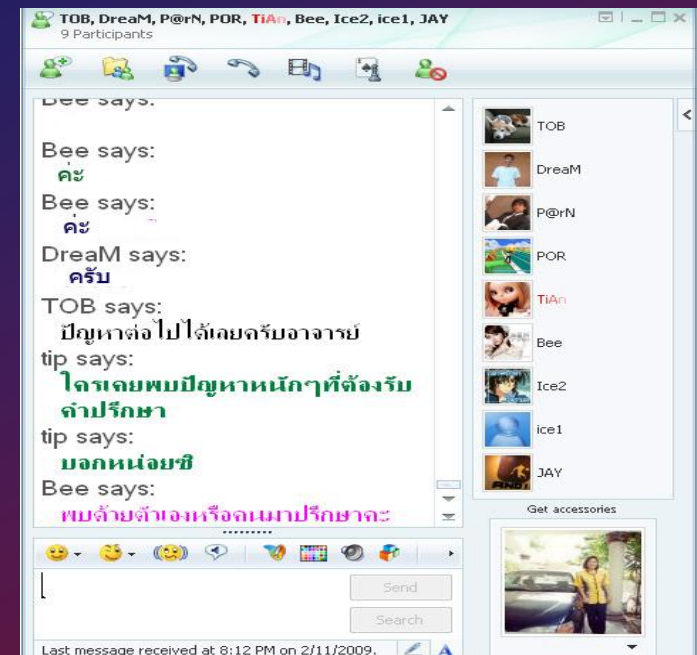

The study results are as following (3)

3. At the end of the follow up period which is 1 month after ending experiment Youth Counselor attended Group Work Activities has the desirable Characteristics for Youth Counselor better than attending the Online Group Work Activities at .05 statistical significant level

after

1 month
after

At .05 statistical significant level

Problems, Constraints, and Solutions

1. Some Youth Counselors, participated less than others. Some participated a lot. The group leader needs to encourage in a positive way .

2. Youth Counselors were anxious when attended Activities . It should to be flexible upon suitable date and time.

Value and Benefit of the Research (1)

1. Good effects on Youth Counselor for 2 Activities.

Youth Counselor develop the desirable Characteristics for Youth Counselor can counsel and suggest solutions for severe problems.

2. Good effects on friends for the Youth Counselor.

This makes Teacher Counselor help students faster.

Value and Benefit of the Research (2)

3. Good effects to School

These tools are used to develop the 192 Youth Counselors in school and another 108 Youth Counselors in another 3 network schools.

Sawasdee

Thank You
